

Most job openings in small cities: Survey

An upbeat India Inc will play it safe while hiring staff since most job openings are likely to be at entry and junior levels in smaller cities, said TeamLease employment outlook report. During the January-March quarter, the business outlook improved 2 per cent to 73 per cent, while the employment outlook moved up by 1 per cent to 69 per cent. "The last two quarters have shown impressive GDP growth of around 8.9 per cent despite inflationary pressures. So, while inflation continues to be a cause of concern, the business sentiment remains positive. This is evident from the reasonably good third quarter numbers," TeamLease Services Vice-President Sangeeta Lala said.
