

“AUTOMATED CALIBRATION OF ELECTRONIC ENERGY METER USING LabVIEW”

**A DISSERTATION SUBMITTED IN PARTIAL FULFILLMENT OF THE
REQUIREMENTS FOR THE AWARD OF THE DEGREE OF**

**MASTER OF ENGINEERING
(CONTROL & INSTRUMENTATION)**

**SUBMITTED BY
VIKASH KUMAR
(Roll No. 9029)**

**UNDER THE SUPERVISION OF
PROF. PARMOD KUMAR
(ELECTRICAL ENGINEERING DEPARTMENT)**

**DEPARTMENT OF ELECTRICAL ENGINEERING
DELHI COLLEGE OF ENGINEERING
DELHI-110042
2009 - 2011**

CERTIFICATE

This is to certify that the work presented in this project entitled “**Automated Calibration of Electronic Energy Meter Using LabVIEW**”, in partial fulfilment of the requirement for the award of the degree of Master of Engineering in Control & Instrumentation submitted by Vikash Kumar (14/C&I/09) to the Department of Electrical Engineering, is a record of the student’s work carried out under my supervision and guidance.

(Dr. PARMOD KUMAR)

Professor
Electrical Engineering Department
Delhi College of Engineering
Delhi-110042

ACKNOWLEDGEMENT

The writing of this dissertation has been one of the most significant academic challenges I have ever had to face, without **GOD**'s blessings and support, patience and guidance of the following people, this study would not have been completed. It is to them that I owe my deepest gratitude.

- Prof. Parmod Kumar Sir, who undertook to act as my supervisor despite his many other academic and professional commitments to the highest standards inspired and motivated me.
- Karan Singh Sir, who was really helpful in every aspect to complete my work.
- My friends, who inspired my final report and work despite the enormous work pressures we are facing together.
- My Parents and brother, who have always supported, encouraged and believed in me, in all my endeavors.

College Roll No.: 14/C&I/09
M.E. (C&I)

ABSTRACT

Electronic energy meter for the measurement of energy by the electric utility and the consumer has been accepted for the accurate measurement of energy consumed. The accuracy of the reading of energy meter is necessarily to be known as any mismatch in reading will start putting burden on the pocket of consumer or utility. Hence these electronic energy meters, which has replaced conventional energy meter, need to be tested and calibrated. Every year crores of electronic energy meter are manufactured to meet the demands. Manual testing and calibration of such a large number of energy meters is not a feasible solution. So the need of automatic calibration is required.

In the present study, the graphical programming of LabVIEW software has been utilized to develop the virtual energy meter which acts as a standard instrument for the calibration purpose. The reading of this standard instrument is compared with the reading of test energy meter. In this way automatic calibration is performed. Virtual instrumentation saves the extra cost, time and energy that are incurred while setting up traditional instrumentation systems. It is a latest form of modern measurement/monitoring technology where all types of measurements are done on front panels created on PC screen.

CONTENTS

CHAPTER 1: INTRODUCTION

1.1 Introduction.....	1
1.2 Principle of Working of Electronic Energy Meter.....	1
1.3 Features of Lab VIEW.....	2
1.4 Advantages of Automation.....	3
1.5 Dissection of Dissertation.....	3

CHAPTER 2: LITERATURE REVIEW

2.1 Introduction	4
2.2 Development History of Lab-View.....	4
2.3 Historical Prospective Of Energy Meter.....	6
2.4 Literature Survey	12

CHAPTER 3: ELECTRONIC ENERGY METER

3.1 Introduction.....	16
3.2 Functional Block Diagram of Electronic Energy Meter.....	17
3.3 Description of Hardware Components.....	18

CHAPTER 4: BRIEF DISSCUSION ON AUTOMATED CALIBRATION OF ENERGY METER

4.1 Introduction.....	25
4.2 Sensors and Phototransistors.....	25
4.2.1 Sensors.....	25
4.2.2 Phototransistors.....	26
4.3 Data Acquisition Device.....	26
4.4 Virtual Instrumentation.....	27

4.4.1 Programming Techniques’	28
4.4.2 Starting a VI.....	33
4.4.3 Troubleshooting and Debugging VI’s.....	34
4.5 Advantages of VI.....	35
4.6 Conclusion.....	36
CHAPTER 5: AUXILIARY COMPONENTS AND INTERFACING DEVICES	
5.1 Introduction.....	37
5.2 Sensor.....	37
5.2.1 Introduction.....	37
5.2.1 Current Sensor.....	37
5.2.2 Voltage Sensor.....	38
5.3 Phototransistor.....	41
5.4 PCLD 8710 screw terminal board.....	44
5.5 Wiring Cable – PCL-10168.....	44
5.6 PCI-1711 Multi Function ADVANTECH DAQ Card.....	45
CHAPTER 6: SYSTEM INTEGRATION FOR THE CALIBRATION OF ENERGY METER	
6.1 Introduction.....	46
6.2 Experimental setup.....	46
6.3 Programming in lab view.....	48
6.4 Oscilloscope.....	57
6.5 Pictorial Representation of Experimental Setup.....	57
6.6 Conclusion.....	58
CHAPYER 7: RESULTS AND DISCUSSION.....	
APPENDIX.....	
REFERENCES.....
