

A
MAJOR REPORT
ON
**FUZZY AND NON-FUZZY REGION GROWING TECHNIQUES
FOR COLOR IMAGE SEGMENTATION**

Submitted in partial fulfillment of the requirement
for the award of the degree of

MASTER OF TECHNOLOGY
(INFORMATION SYSTEM)

Submitted by
PUNEET KUMAR JAIN
(08/IS/09)

Under the Guidance of
SEBA SUSAN
(Asst. Professor)
Dept. of Information Technology

DELHI TECHNOLOGICAL UNIVERSITY
(DEPARTMENT OF INFORMATION TECHNOLOGY)
BAWANA ROAD, DELHI-110042

SESSION: 2009-11

CERTIFICATE

This is to certify that the MAJOR REPORT titled as “**FUZZY AND NON-FUZZY REGION GROWING TECHNIQUES FOR COLOR IMAGE SEGMENTATION**” is being submitted by PUNEET KUMAR JAIN Class roll no. 08/IS/09, in partial fulfillment for the award of “Master of Technology Degree in Information System” in Delhi Technological University, Delhi; is the original work carried out by him under the guidance and supervision. The matter contained in this report has not been submitted elsewhere for reward for any other degree.

(PROJECT GUIDE)

SEBA SUSAN

ASSISTANT PROFESSOR

DEPT. OF INFORMATION TECHNOLOGY

DELHI TECHNOLOGICAL UNIVERSITY

BAWANA ROAD, DELHI-110042

ACKNOWLEDGEMENT

Firstly , I would like to express my hearty gratitude and thanks to my project guide SEBA SUSAN , Asst. Prof. of Information Technology Dept. ; D.T.U. Delhi. For continuous inspiration, encouragement and guidance in every stage of preparation of this project report.

I am extremely thankful to Prof. O.P.VERMA, Head of Dept. of Information Technology, D.T.U., Delhi, for the support provided by him during the entire duration of degree course and especially in this thesis. I am thankful to all teaching and non-teaching staff at D.T.U., and my fellows, who have helped me directly or indirectly in completion of this thesis report.

PUNEET KUMAR JAIN
(M.Tech. INFORMATION SYSTEM)
COLLEGE ROLL NO. 08/IS/09

ABSTRACT

This thesis focuses on a specific branch of computer vision called image segmentation. The objective of image segmentation is to extract the semantic objects present in images either by dividing any given image into meaningful contiguous regions, or by extracting one or more important objects in images. In this master thesis a novel image segmentation algorithm based on region growing method is presented.

The proposed method starts with center pixel of the image. Method uses intensity based growing formula in which it first checks for similarity of pixel (to be label) with respect to connected pixel and with mean value of growing region. If it fulfills criteria then it includes the pixel in growing region. Otherwise it analyzes closeness of pixel with respect to its 8-neighbors and the mean value of growing region. If it is closer to growing region compared to its neighbors then it is included in growing region, otherwise it is labeled as boundary pixel. After one region is completely grown, next seed pixel is selected from the boundary pixel stack. The proposed algorithm have been applied to Berkley images with successful results and evaluation of segmented images has been done using Liu's F-factor, total number of regions segmented and time taken by algorithm. A fuzzy rule based modification of the algorithm is also proposed in which decision making steps is solved by fuzzy rule and basic flow of algorithm remain same. The proposed algorithm is also compared with method proposed by Chaobing Huang and another one proposed by Juliana Fernandes Camapum. On the basis of Liu's F-factor it can be said that the proposed algorithm's results are better as compared to both.

CONTENT

CHAPTER 1	1
INTRODUCTION TO IMAGE SEGMENTATION	
1.1 IMAGE SEGMENTATION	
1.2 CONVENTIONAL IMAGE SEGMENTATION TECHNIQUES	
A. Thresholding based	
B. Edge based	
C. Clustering based	
D. Region splitting and merging based	
E. Region growing based	
F. Fuzzy logic based	
G. Graph based	
CHAPTER 2	8
REVIEW OF SEED BASED REGION GROWING METHOD	
2.1 INTRODUCTION	
2.2 LITERATURE SURVEY	
CHAPTER3	13
PROPOSED SINGLE SEEDED REGION GROWING ALGORITHM	
3.1 MOTIVATION	
3.2 PROPOSED ALGORITHM	
CHAPTER 4	16
PROPOSED FUZZY RULE BASED REGION GROWING ALGORITHM	
4.1 MOTIVATION	
4.2 PROPOSED ALGORITHM	

CHAPTER5	19
RESULTS AND DISCUSSION	
5.1 EXPERIMENTAL SETUP	
A. LIU'S F-FACTOR	
B. TOTAL TIME TAKEN	
C. TOTAL NUMBER OF REGIONS	
5.2 PROPOSED SINGLE SEEDED REGION GROWING ALGORITHM RESULTS	
5.3 PROPOED FUZZY SEEDED REGION GROWING ALGORITHM RESULTS	
5.4 COMPARISION WITH OTHER TECHNIQUES	
CHAPTER6	44
CONCLUSION AND FUTURE WORK	
6.1 CONCLUSION	
6.2 FUTURE WORK	
APPENDIX	45
REFRENCES	49
