LIST OF FIGURES

Fig. No.	LIST OF FIGURES	Page No.
Fig. 1	General mechanism of type 1 hypersensitivity.	5
Fig. 2	Skin prick test for diagnosing allergy.	7
Fig. 3	RAST test for diagnosing allergy.	7
Fig. 4	The classification of allergens according to source and route of exposure.	23
Fig. 5	Linear epitopes (5A) and conformational epitopes (5B).	29
Fig. 6	The epitopes that are predicted and mapped on the surface of Bet v 1.	31
Fig. 7	Screenshot of Uniprot-KB with Ovalbumin as query sequence.	39
Fig. 8	Screenshot of PIR studies.	40
Fig. 9	Screenshot of NCBI protein database.	41
Fig. 10	The screen shot of AlgPred home page.	42
Fig. 11	The screen shot of submission page with a protein sequence in submission window.	42
Fig. 12	The result page after submitting the protein sequence.	43
Fig. 13	Uniprot ID mapping tool.	43
Fig. 14	The screenshot of home page of I-TASSER.	44
Fig. 15	The screenshot of home page of PHYRE-2.	44
Fig. 16	The screenshot of home page of Ellipro.	45
Fig. 17	The result page of Ellipro. Linear and Discontinuous epitopes are predicted.	45
Fig. 18	The screenshot of home page of SEPPA.	46
Fig. 19	The result for 1OVA.	46
Fig. 20	The visualization predicted of antigenic residues in Jmol.	47
Fig. 21	The score file for each residue of 1OVA.	47
Fig. 21	The screenshot of home page of Epitopia.	48
Fig. 23	The epitopes mapped on the surface of ovalbumin.	48
Fig. 24	Highly immunogenic residues predicted for ovalbumin.	49
Fig. 25	Immunogenicity score and probability score for each antigenic residue in ovalbumin.	49
Fig. 26	The epitopes mapped on the sequence of ovalbumin.	50
Fig. 27	Immunogenicity score and probability score for each antigenic residue in ovalbumin.	50
Fig. 28	The predicted epitope patches in decreasing order of p-value.	51
Fig. 29	The SPADE window.	52
Fig. 30	The IgE epitopes determined experimentally.	59
Fig. 31	The antigenic residues mapped on the protein.	60
Fig. 32	The predicted epitopes mapped by Epitopia.	62
Fig. 33	The epitopes mapped on ovalbumin by SPADE.	64
Fig. 34	The linear epitopes mapped on the sequence.	67
Fig. 35	The overlapping of conformational epitopes predicted by SPADE, Epitopia and SEPPA.	72
Fig. 36	The overlapping of linear epitopes predicted by Epitopia and Ellipro.	72
Fig. 37	The IgE epitopes determined experimentally.	73
Fig. 38	The overlapping of conformational epitopes predicted by SPADE, Epitopia and SEPPA.	73
Fig. 39	The overlapping of linear epitopes predicted by Epitopia and Ellipro.	74
Fig. 40	Antigenic residues mapped by SEPPA.	76
Fig. 41	The antigenic residues mapped on the protein.	77
Fig. 42	The epitopes mapped on lysozyme by SPADE.	77

Fig. 43	The linear epitopes mapped on the sequence.	81
Fig. 44	The consensus conformational epitopes predicted by SPADE, Epitopia and SEPPA for lysozyme.	83
Fig. 45	The consensus linear epitopes predicted by Epitopia and Ellipro for lysozyme.	83
Fig. 46	The consensus conformational epitopes (A) and linear epitopes (B) predicted for interleukin 12.	84
Fig. 47	The consensus conformational epitopes (A) and linear epitopes (B) predicted for Peptide Prolyl Cis Trans Isomerase.	84
Fig. 48	The consensus conformational epitopes (A) and linear epitopes (B) predicted for calsequestrin.	85
Fig. 49	The consensus conformational epitopes (A) and linear epitopes (B) predicted for 78 KDA Glucose Regulated Protein.	85
Fig. 50	The consensus conformational epitopes (A) and linear epitopes (B) predicted for Lymphocyte Antigen 86.	86
Fig. 51	The consensus conformational epitopes (A) and linear epitopes (B) predicted for Peptide Prolyl Cis Trans Isomerase B.	86
Fig. 52	The consensus conformational epitopes (A) and linear epitopes (B) predicted for Ovalbumin Related Protein Y.	87
Fig. 53	The consensus conformational epitopes (A) and linear epitopes (B) predicted for Ovotransferrin.	87
Fig. 54	The consensus conformational epitopes (A) and linear epitopes (B) predicted for Vimentin.	88
Fig. 55	The consensus conformational epitopes (A) and linear epitopes (B) predicted for C-SKI protein.	88
Fig. 56	The consensus conformational epitopes (A) and linear epitopes (B) predicted for Serum albumin.	89
Fig. 57	The consensus conformational epitopes (A) and linear epitopes (B) predicted for Ovoinhibitor.	89

LIST OF TABLES

Table No.	LIST OF TABLES	Page No.
Table 1	Percentage of children affected by various allergens.	3
Table 2	Percentage of adults affected by various allergens.	4
Table 3	The effect of various mediators in hypersensitive reactions.	5
Table 4	The list of allergen databases with their respective url's.	18
Table 5	Number of sequences and protein families of allergens in Allfam.	22
Table 6	Representing classification of allergens into protein families.	23
Table 7	Bet v 1 as reference protein and proteins cross-reactive to reference protein.	31
Table 8	Proteins in hen's egg.	55
Table 9	The proteins predicted as potential allergens out of complete egg proteome.	56
Table 10	The description of potential allergens. Name and length of each predicted allergen is specified.	56
Table 11	The classification of potential allergens into functional domains.	57
Table 12	The availability of structural file in PDB for allergen proteins.	58
Table 13	Antigenic residues predicted by SEPPA.	59
Table 14	Antigenic residues predicted by Epitopia	62
Table 15	The Highly cross reactive proteins (HCR) chosen for prediction.	53
Table 16	The Weakly cross reactive proteins (WCR) chosen for prediction.	63
Table 17	Epitopes predicted by SPADE.	63
Table 18	The value of various parameters predicted for each patch by SPADE.	64
Table 19	The linear epitopes predicted by Epitopia.	66
Table 20	Linear epitopes predicted by Ellipro.	71
Table 21	The colour codes for epitopes mapped by different approaches.	72
Table 22	Antigenic residues predicted by SEPPA.	76
Table 23	Antigenic residues predicted by Epitopia.	77
Table 24	The Highly cross reactive proteins (HCR) chosen for prediction.	77
Table 25	The Weakly cross reactive proteins (WCR) chosen for prediction.	77
Table 26	Epitopes predicted by SPADE.	78
Table 27	The value of various parameters predicted for each patch by SPADE.	79
Table 28	Linear epitopes predicted by Epitopia.	80
Table 29	Linear epitopes predicted by Ellipro.	82
Table 30	The consensus conformational and linear epitope positions in lysozyme.	83
Table 31	The consensus conformational and linear epitope positions in interleukin 12.	84
Table 32	Consensus conformational and linear epitope positions for Peptide Prolyl Cis Trans Isomerase.	84
Table 33	The consensus conformational and linear epitope positions for calsequestrin.	85
Table 34	The consensus conformational and linear epitope positions for 78 KDA Glucose Regulated Protein.	85
Table 35	The consensus conformational and linear epitope positions for Lymphocyte Antigen 86.	86
Table 36	The consensus conformational and linear epitope positions in Prolyl Cis Trans Isomerase B.	86
Table 37	The consensus conformational and linear epitope positions in Ovalbumin Related Protein Y.	87
Table 38	The consensus conformational and linear epitope positions in Ovotransferrin.	87
Table 39	The consensus conformational and linear epitope positions in Vimentin.	88

Table 40	The consensus conformational and linear epitope positions in C-SKI protein**.**	88
Table 41	The consensus conformational and linear epitope positions in Serum albumin.	89
Table 42	The consensus conformational and linear epitope positions in Ovoinhibitor.	89

LIST OF ABBREVIATIONS

ARP	Antigen Representative Peptides
BIFS	Biotechnology Information for Food Safety
bLG	Beta Lactoglobulin
BPI	Bacterial Permeability Increasing Protein
CSL	Central Science Laboratory allergen database
DBPCFC	Double Blind Placebo Controlled Food Challenges
Ex-FABP	Extra Fatty Acid Binding Protein
FARRP	Food Allergen Research and Resource Program allergy database
IgE	Immunoglobulin G
M. MASS	Molecular Mass
NCBI	National Center for Biotechnology Information
nsLTP	non-specific Lipid Transfer Protein
PIR	Protein Information Resource
PR	Pathogenesis Related Protein
SCOP	Structural Classification of Proteins
SDAP	Structural Database of Allergenic Proteins
SEPPA	Spatial Epitope Prediction Of Protein Antigens
SPADE	Surface comparison based Prediction of Allergenic Discontinuous Epitopes
SPT	Skin Prick Test
SVM	Support Vector Machine
Uniprot-KB	UniProt Knowledgebase
