

A
Major Project Report II
On
**ACTIVITY RECOGNITION USING
FINITE ELEMENT METHOD**

Submitted in Partial fulfillment of the requirement
For the award of the degree of

MASTER OF TECHNOLOGY
In
(Signal Processing and Digital Design)

Submitted by
Money Jain
Roll No. DTU/M.Tech/172
Under the Guidance of
Dr. Rajiv Kapoor
Department of Electronics and Communication Engineering

**DEPARTMENT OF ELECTRONICS & COMMUNIATION
ENGINEERING**

DELHI TECHNOLOGICAL UNIVERSITY

BAWANA ROAD, DELHI- 110042

June 2012

DECLARATION BY THE CANDIDATE

June 2012

Date: _____

I hereby declare that the work presented in this dissertation entitled “**Activity Recognition using Finite Element Method**” has been carried out by me under the guidance of Dr. Rajiv Kapoor, Department of Electronics & Communication Engineering, Delhi Technological University, Delhi and hereby submitted for the partial fulfillment for the award of degree of Master of Technology in Signal Processing & Digital Design at Electronics & Communication Department, Delhi Technological University, Delhi.

I further undertake that the work embodied in this major project has not been submitted for the award of any other degree elsewhere.

Money Jain

DTU/M.Tech/172

M.Tech (SP&DD)

CERTIFICATE

It is to certify that the above statement made by the candidate is true to the best of my knowledge and belief.

Dr. Rajiv Kapoor

Head of Department

Electronics & Communication Department

Delhi Technological University, Delhi-42

Dated: _____

ACKNOWLEDGEMENT

At this point I would like to thank the people that helped me producing this dissertation. First, I thank **Dr. Rajiv Kapoor** Head of Department (Electronics and Communication Engineering, DTU), for giving me the opportunity to write this dissertation and supporting me along the way. Next, I would like to say thanks to all my seniors and friends for their goodwill and support that helped me a lot in successful completion of this dissertation. I also want to thank my senior sir, Om Mishra for providing me support throughout the completion of the project.

Money Jain

DTU/M.Tech/172

M.Tech (SP&DD)

ABSTRACT

The motivation behind this project is to develop software for tracking and recognizing the human activity major application in security, surveillance and vision analysis. The developed software must be capable of tracking the human body and recognizing its activity. The proposed method uses the approach for features extraction from the sequences of images. The method describes about the recognition of human activity with the help of change in energy produced by motion of the connected pixels in an image and then we used the support vector machine as the classifier. The proposed technique takes care of the real time implementation of the technique and in qualitative decision making both and shows better results. This technique is capable of understanding the activity. The statistical confidence is higher as compared to the previous techniques because the activity recognition is based upon the features of not just one organ but also on the dependent organs. This method works in real time and is inherently parallel

CERTIFICATE.....	iii
ACKNOWLEDGEMENT	iv
ABSTRACT	v
LIST OF FIGURES	viii
Chapter-1.....	1
INTRODUCTION	1
1.1 Introduction	1
1.2 Background	2
1.2.1 Pattern Recognition	2
1.2.2 Machine learning.....	3
1.2.3 Computer vision	8
Chapter-2.....	9
LITERATURE SURVEY.....	9
Chapter-3.....	11
RESEARCH, AIMS AND OBJECTIVES	11
Chapter-4.....	12
METHODOLOGY.....	12
4.1 Pre-processing.....	13
4.2 Background subtraction.....	14
4.3 Features Extraction:.....	17
4.3.1 Approach	18
Chapter- 5.....	24
CLASSIFIERS.....	24
5.1 Classifier –overview	24

5.1.1 k-Nearest Neighbors algorithm.....	25
5.1.2 Neural network	27
5.1.3 Bayes classifier	29
5.1.4 Hidden markov model.....	29
5.2 Support vector machine	30
5.3 Decision:.....	32
Chapter- 6.....	33
RESULT & CONCLUSION.....	33
6.1 Experimental Result	33
6.2 Conclusion.....	35
References	36
