

PHOSPHATE REMOVAL FROM WASTEWATER

BY CANNA LILY

**A PROJECT REPORT SUBMITTED IN PARTIAL FULFILMENT OF THE
REQUIREMENTS FOR THE DEGREE**

OF

MASTER OF TECHNOLOGY

IN

ENVIRONMENTAL ENGINEERING

Submitted by:

**Sarbari Dutta
(2K11/ENE/03)**

Research Supervisor:

**Dr. A . K. Haritash
Dr. P. Albino Kumar**

**Department of Environmental Engineering
Delhi Technological University
June, 2013**

CERTIFICATE

This is to certify that this report entitled “**PHOSPHATE REMOVAL FROM WASTEWATER BY CANNA LILY**” is an authentic report of the major project done by **Sarbari Dutta (2K11/ENE/03)** in the partial fulfillment of the requirement for the award of the degree of Master of Technology in Environmental Engineering in the Delhi Technological University during the year 2013.

Date:

Place:

Dr. A . K. Haritash
(Research Supervisor)

ACKNOWLEDGEMENT

It is of extreme pleasure to express my deep sense of gratitude and indebtedness to my guide **Dr A.K. Haritash** and **Dr. P. Albino Kumar**, Department of Environmental Engineering, Delhi Technological University (Formerly Delhi College of Engineering), for their invaluable guidance, encouragement and patient reviews. Without their help and guidance, this dissertation would have been impossible.

It gives me immense pleasure to take this opportunity to thank our Head of Department of Environmental Engineering, **Prof. S. K. Singh** for providing the lab facilities required to carry out the project. I am also thankful to all other teachers of the department who directly or indirectly helped me in completion of my project successfully.

A special word of thanks to Mr. Sunil Tirkey, and Ms. Navita laboratory staff of Environmental Engineering Department for their help and support in my laboratory work.

I am grateful to my parents for their moral support, they have been always around to cheer me up, in the odd times of this work. I am also thankful to my classmates and friends Sarah and Bhabna for their unconditional support and motivation during this work.

Roll No. 2K11/ENE/03

CONTENT

1.Introduction	1-3
2. Literature review	4-18
2.1 Wetland Vegetation	5-10
2.1.1 Water hyacinth	5-7
2.1.2 <i>Lemna</i>	7
2.1.3 <i>Typha</i>	7-8
2.1.4 <i>Canna lily</i>	8-10
2.2 Contaminant Removal mechanisms in the Constructed Wetlands	10-13
2.2.1 Removal mechanism of Organic compounds	11-12
2.2.2 Removal mechanism of Suspended Solids	12
2.2.3 Removal mechanism of Heavy Metals / Contaminants	12
2.2.4 Removal mechanism of Nutrients (Nitrogen and Phosphorus)	12-13
2.3 Role of aquatic mycrophytes in secondary-treated wastewater	13-16
2.3.1 BOD, COD, TDS, TSS Removal Efficiency	13-14
2.3.2 Removal of Heavy Metal	14
2.3.3 Removal of Total Nitrogen	14-15
2.3.4 Removal of Phosphate (P)	15-16
2.4 Mobility of Phosphorus in the Sediment of Wetland System	16-18
2.4.1 Phosphorus Fraction Present in Sediments	17-18
3. Materials and Methods	19-30
3.1 Bench-scale wetland	19

3.2	Plants	19-20
3.3	Experiments	20
3.3.1	Experiment-I (Waste Water Analysis)	20
3.3.2	Experiment-II (Sediment Analysis)	20
3.3.3	Experiment-III (Plant Analysis)	20
3.4	Phosphate-Fractions	22-28
3.4.1	Available Phosphate	22-23
3.4.2	Total Phosphate	24
3.4.3	Inorganic Phosphate	26
3.4.4	Non-Appetite Inorganic Phosphate (NAIP)	27
3.4.5	Appetite Inorganic Phosphate (AP)	27-28
3.5	Measurement of Phosphate in Plant Tissue	28-30
4.	Results and Discussion	31-46
4.1	Ambient temperature profile	31-32
4.2	Analysis of Waste Water Samples	33-38
4.3	Analysis of Sediment Samples	39-42
4.4	Analysis of Plant Tissue	43
4.5	Effect of wastewater on <i>Canna Lily</i>	44-45
4.6	Conclusion	46
5.	Summary	47-48
6.	Bibliography	49-53

LIST OF TABLES

Table No.	Particulars	Page No.
4.1	Ambient temperature profile during the study period	32
4.2	Percent Removal of TP and AP by <i>canna lily</i>	37-38
4.3	Summary of Laboratory Test Results	40
4.4	Fraction of Phosphate present in sediment before and after the study	42
4.5	Characteristics of <i>Canna lily</i> before and after the experiment	45

LIST OF FIGURES

Figure No.	Particulars	Page No.
2.1	Emergent Aquatic Macrophytes , Floating and Submerged Aquatic Macrophytes	6
2.2	Common Wetland Vegetation: 1. Water Hyacinth, 2. <i>Lemna minor</i> , 3. <i>Typha</i>	6
2.3	<i>Canna lily</i>	9
2.4	Diagram courtesy of Soil and Water Science Department, Florida Cooperative Extension Service,	17
3.1	Line Diagram of Experimental plot planted with <i>Canna lily</i>	19
3.2	Experimental plot filled with gravel-sand bed planted with <i>Canna lily</i>	21
3.3	Photograph of Sample Collection	21
3.4	Standards of Phosphate	23
3.5	Extraction of Total Phosphate in Microwave Digestion Unit	25
3.6	Photograph of Sediment collected from the wetland	26
3.7	Photograph of various parts of plant	29
4.1	Ambient temperature profile	31
4.2	Influent and Effluent concentration (mg/l) of Total Phosphate	33
4.3	Removal efficiency (%) of <i>Canna lily</i> (Total Phosphate)	34
4.4	Influent and Effluent concentration (mg/l) of Available Phosphate	35
4.5	Removal efficiency (%) of <i>Canna lily</i> (Available Phosphate)	36
4.6	Particle size Distribution of Sediments	40
4.7	Comparison study between Initial and Final sediment samples	41
4.8	Total Phosphate Concentration (mg/g) in different Plant tissues	43
4.9	Growth parameters of <i>Canna lily</i> before and after the experiment	44

ABBREVIATIONS

APHA:	American Public Health Association
AP:	Available Phosphate
AIP:	Appetite Inorganic Phosphate
BOD:	Biochemical Oxygen Demand
COD:	Chemical Oxygen Demand
CW:	Constructed Wetland
DO:	Dissolved Oxygen
G:	Specific Gravity
HCl:	Hydrochloric acid
HRT:	Hydraulic Retention Time
IP:	Inorganic Phosphate
KW:	Kilo-Watt
NAIP:	Non-Appetite Inorganic Phosphate
OP:	Organic Phosphate
ppm:	Parts per million
RGR:	Relative Growth Rate
SF:	Surface Flow
SSFW:	Sub-Surface Flow Wetland
TDS:	Total Dissolved Solids
TP:	Total Phosphate
