

**DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING
DELHI TECHNOLOGICAL UNIVERSITY**

DECLARATION

I hereby declare that the project entitled “**IMPLEMENTING PARALLEL PSO ALGORITHM USING MAPREDUCE ARCHITECTURE**” submitted by me in the partial fulfillment of the requirements for the award of the degree of Master of Technology (Software Engineering) of Delhi Technological University is record of my own work carried under the supervision and guidance of **Dr. Kapil Sharma**.

To the best of my knowledge this project has not been submitted to Delhi Technological University or any other University or Institute for the award of any degree.

PRATEEK KUMAR VARSHNEY
[2K13/SWE/11]

ACKNOWLEDGEMENT

In the sense of great pleasure and satisfaction I present this project entitled “**IMPLEMENTING PARALLEL PSO ALGORITHM USING MAPREDUCE ARCHITECTURE**”.

The completion of this project is no doubt a product of invaluable support and contribution of number of people.

I would like to express my sincere thanks to my guide **Dr. Kapil Sharma** (Associate Professor, Department of Computer Science and Engineering) for his continuous help and valuable suggestions and also providing encouraging environment, without which my project and its documentation would not have been possible.

The completion of any task is not only the reward to the person activity involved in accomplishing it, but also the person involved in inspiring and guiding. I am grateful to my friends and family for their constant motivation and comments that has helped me to complete this report.

PRATEEK KUMAR VARSHNEY

[2K13/SWE/11]

ABSTRACT

Optimization is the problem of finding minimum or maximum of a given objective function relative to some set, often representing a range of choices available in a certain situation. Particle Swarm Optimization (PSO) is a simple and effective evolutionary algorithm, but it may take a reasonable time to optimize complex objective functions which are deceptive or expensive. To avoid being trapped in local optima, Particle Swarm Optimization requires extensive exploration for multimodal and multidimensional functions. Expensive functions whose computational complexity may arise from dependence on detailed simulations or large datasets, takes a long time to evaluate. For such functions PSO must be parallelized to use multiprocessor systems and clusters efficiently. Parallelization of PSO can lead to scalable speedup in performance. PSO can be naturally expressed in Google's MapReduce framework to develop a simple and robust parallel implementation.

To improve optimization of difficult objective functions and to improve parallel performance, modifications could be made to this flexible implementation of the algorithm. In the proposed work the classic Particle Swarm Optimization Algorithm has been implemented on Big Data platform Hadoop using MapReduce Architecture. The algorithm has been applied to optimize parameters of basic COCOMO Model need to calculate effort of the project.

The experiments show that the Hadoop could carry out big data calculations which normal serial PSO could not. The proposed model would have better efficiency for intensive computational functions.

Certificate	ii
Declaration	iii
Acknowledgement	iv
Abstract	v
Table of Contents	vi-viii
CHAPTER 1	1-4
1. INTRODUCTION	1
1.1 Motivation	2
1.2 Objective	3
1.3 Thesis Outline	4
CHAPTER 2	5-6
2. LITERATURE REVIEW	5
CHAPTER 3	7-29
3. RESEARCH BACKGROUND	7
3.1 Particle Swarm Optimization	7
3.1.1 Overview	7
3.1.2 Optimization	8
3.1.3 The PSO Algorithm	10
3.1.4 Applications	13
3.2 Big Data	14

3.2.1 Definition	15
3.2.2 Characteristics: The Four V's of Big Data	16
3.2.3 Big Data Challenges	18
3.2.4 Benefits of Big Data Analytics	20
3.3 Map Reduce Architecture	22
3.3.1 Inputs and Outputs	24
3.3.2 Workflow	24
3.3.3 Benefits	29
CHAPTER 4	30-40
4. APACHE HADOOP	30
4.1 Characteristics of Hadoop	31
4.2 Hadoop Cluster	32
4.3 Hadoop Ecosystem	33
4.4 Comparison between Hadoop and Distributed Databases	34
4.5 Benefits	34
4.6 Hadoop Distributed File System (HDFS)	36
4.6.1 HDFS Daemons	37
4.6.2 HDFS File Read and Write	39
CHAPTER 5	41-46
5. IMPLEMENTATION AND RESULTS	41
CHAPTER 6	47
6. CONCLUSION AND FUTURE WORK	47
