Neurological Channelopathic Knowledge Base (NCKB): An application software for Ion channels and Neurological channelopathies

A Major Project dissertation submitted

in partial fulfilment of the requirement for the degree of

Master of Technology

In

Bioinformatics

Submitted by

Dhiraj

(2K12/BIO/06)

Delhi Technological University, Delhi, India

Under the supervision of

Dr. Pravir Kumar

Department of Biotechnology
Delhi Technological University
(Formerly Delhi College of Engineering)
Shahbad Daulatpur, Main Bawana Road,
Delhi-110042, INDIA

CERTIFICATE

This is to certify that the M. Tech. dissertation entitled **"NEUROLOGICAL CHANNELOPATHIC KNOWLEDGE BASE (NCKB): AN APPLICATION SOFTWARE FOR ION CHANNELS AND NEUROLOGICAL CHANNELOPATHIES"**, submitted by **DHIRAJ (2K12/BIO/06)** in partial fulfilment of the requirement for the award of the degree of Master of Technology, Delhi Technological University (Formerly Delhi College of Engineering, University of Delhi), is an authentic record of the candidate's own work carried out by him under my guidance.

The information and data enclosed in this dissertation is original and has not been submitted elsewhere for honouring of any other degree.

Date: 25th June 2014

Dr. Pravir Kumar
(Project Mentor)

Delhi Technological University
(Formerly Delhi College of Engineering, University of Delhi)
Adjunct Faculty, Neurology Department, Tufts University School of Medicine, Boston, MA (USA)

DECLARATION

I hereby declare under oath that this master's thesis is the product of my own independent work under the guidance of Dr. Pravir Kumar, Associate Professor. All content and ideas drawn directly or indirectly from external sources are indicated as such. The thesis has not been submitted to any other examining body and has not been published.

Date: 25th June 2014
Place: New Delhi

ACKNOWLEDGEMENT

At the time of submission of our Major Project thesis, I would first like to thank GOD for giving me patience, strength, capability and willpower to complete my work. Apart from our efforts, the success of this project depends largely on the encouragement and guidelines of many others. I, therefore, take this opportunity to express my gratitude to the people who have been instrumental in the successful completion of this project.

My initial thank is addressed to our mentor Dr. Pravir Kumar who gave us this opportunity to work in a project under him. It was his enigmatic supervision, constant encouragement and expert guidance which have enabled me to complete this work. I humbly seize this opportunity to express my gratitude to him.

I would like to extend my sincere gratitude to Prof. B.D. Malhotra for providing basic infrastructure and facilities.

Also, I value the keen observation and continuous advice of Dr. Rashmi Ambasta in helping me. Their thoughtful inputs on the project issues have been invaluable and have indispensable for the productive progress of the project. I extend my thanks to technical staff Mr. Jitender Singh and Mr. C.B. Singh who had been an aid whenever required. Lastly, I wish to extend my thanks to my families and friends who have supported and encouraged me through the entire process.

DHIRAJ

CONTENTS

TOPIC	PAGE NO
LIST OF FIGURES	1
LIST OF TABLES	2
LIST OF ABBREVIATIONS	3
1. ABSTRACT	4
2. INTRODUCTION	5
3. REVIEW OF LITERATURE	8
3.1 Importance of Ion channels	8
3.2 Ion channels and Underlying genetic diversity	8
3.2.1 Sodium ion channel	8
3.2.2 Potassium ion channel	10
3.2.3 Calcium ion channel	11
3.2.4 Chloride ion channel	13
3.3 Molecular Entities of Ion channels	14
3.3.1 Sodium channel structure	14
3.3.2 Potassium channel structure	14
3.3.3 Calcium channel structure	14
3.3.4 Chloride channel structure	15
3.4 Ion channel and Neurological diseases	16
3.4.1 Sodium ion channelopathies with Molecular Mechanism	16
3.4.1.1 Potassium Aggravated Myotonia (PAM)	16
3.4.1.2 Para Myotonia Congenita (PMC)	17
3.4.1.3 Hyperkalemic Periodic Paralysis (HYKPP)	17
3.4.1.4 Primary Erythro-Melalgia (PEM)	18
3.4.1.5 Paroxysmal Extreme Pain Disorder (PEPD)	18
3.4.1.6 Congenital Insensitivity to Pain (CIP)	19
3.4.1.7 Generalized Epilepsy with Febrile Seizure (GEFS)	19
3.4.2 Potassium ion channelopathies with Molecular Mechanism	20
3.4.2.1 Paroxysmal Dyskinesia (PD)	20
3.4.2.2 Benign Familial Neonatal Seizure (BFNS)	20
3.4.2.3 Andersen Tawil Syndrome	21
3.4.2.4 SeSAME and EAST Syndrome	21
3.4.2.5 Jervell and Lange Nielson Syndrome (J-LN)	22
3.4.2.6 Cardiac Arrhythmias	22

3.4.3 Calcium ion channelopathies with Molecular Mechanism 23
3.4.3.1 Spino Cerebellar Ataxia type-6 (SCA6) 23
3.4.3.2 Hypokalemic Periodic Paralysis (HypoPP) 23
3.4.3.3 Episodic Ataxia (EA) 24
3.4.3.4 Familial Hemiplegic Migraine (FHM) 24
3.4.4 Chloride ion channelopathies with Molecular Mechanism 25
3.4.4.1 Myotonia Congenita 25
3.4.4.2 Thomsen's Disease 25
3.4.4.3 Becker's Disease 26

4. METHODOLOGY 29
4.1 Database creation using SQL server Management Studio 2005 29
4.1.1 Steps for Database creation 29
4.2 Software development using Microsoft Visual Studio 2008 34
4.2.1 Building a project using Microsoft Visual Studio 2008 34
4.2.2 Designing of Window Forms 35
4.2.3 Form Coding using C# 40
4.2.4 Packaging of Software 64
4.3 Installation of Neurological Channelopathic Knowledge Base (NCKB) Software into another computer 80
