

A
Major Project-II Report
On

**TRUNCATED SVD WITH CONDITIONAL COLLABORATIVE
FILTERING RECOMMENDER SYSTEM**

Submitted in Partial Fulfillment of the Requirement for the
Degree of
MASTER OF TECHNOLOGY
In
SOFTWARE ENGINEERING

By
MANIKA AGARWAL
2K14/SWE/10
Under the Esteemed guidance of
Mr. Manoj Sethi

DELHI TECHNOLOGICAL UNIVERSITY
(Formerly Delhi College of Engineering)
Shahabad Daultpur, Main Bawana Road,
Delhi-110042.
JUNE, 2016

DELHI TECHNOLOGICAL UNIVERSITY

CERTIFICATE

This is to certify that Major Project-II Report entitled “**Truncated SVD with conditional Collaborative Filtering Recommender System**” submitted by **Manika Agarwal, Roll No. 2K14/SWE/10** for partial fulfillment of the requirement for the award of degree Master of Technology (Software Engineering) is a record of the candidate work carried out by her under my supervision.

Mr. Manoj Sethi
Project Guide
Department Of Computer Science & Engineering
Delhi Technological University

DELHI TECHNOLOGICAL UNIVERSITY

DECLARATION

We hereby declare that the major Project-1I work entitled “**Truncated SVD with conditional Collaborative Filtering Recommender System**” which is being submitted to Delhi Technological University, in partial fulfillment of requirements for the award of degree of Master Of Technology(Software Engineering) is a bonafide report of Major Project-1I carried out by me. The material contained in the report has not been submitted to any university or institution for the award of any degree.

Manika Agarwal

2K14/SWE/10

DELHI TECHNOLOGICAL UNIVERSITY

ACKNOWLEDGEMENT

First of all, I would like to express my deep sense of respect and gratitude to my project supervisor Mr. Manoj Sethi for providing the opportunity of carrying out this project and being the guiding force behind this work. I am deeply indebted to him for the support, advice and encouragement he provided without which the project could not have been a success.

Secondly, I am grateful to Dr. O.P.Verma, HOD, Computer Science & Engineering Department, DTU for his immense support. I would also like to acknowledge Delhi Technological University library and staff for providing the right academic resources and environment for this work to be carried out.

Last but not the least I would like to express sincere gratitude to my parents and friends for constantly encouraging me during the completion of work.

Manika Agarwal
University Roll no: 2K14/SWE/10
M.Tech (Software Engineering)
Department of Computer Engineering
Delhi Technological University
Delhi – 110042

ABSTRACT

Recommender Systems are designed to suggest personally to each of the users the items they are most likely to like. Sparsity of the User Matrix, cold-start and scalability of the algorithm to real world are the key issues that a good recommender system aims to address.

The collaborative filtering based recommendation systems are based on the classical Bayesian equation of conditional probability. They can be either item based or user based, depending on the strategy by which neighbourhood is found.

Singular Value decomposition is the matrix factorization technique, that aims at reducing the resource (memory) requirements with minimum possible information loss, measured by frobenius norm. Truncated SVD involves keeping only the significant eigen vectors and thus only their corresponding rows and columns.

The proposed Hybrid algorithm aims at combining, experimentally, the knowledge about the preferences of user from the truncated svd approach and the collaborative filtering. This essentially translates to the problem of determining the 2 constants which act as weights for the combination.

The accuracy calculation of the results can be inferred from the error rates computed from the results, thus we use several methods of computing error, so that the wholesome view. RMSE, MAE and REM are three of the error evaluation variations.

LIST OF ABBREVIATIONS

CBR	Case Based Reasoning
CF	Collaborative Filtering
IBCF	Item Based Collaborative filtering
KNN	K- Nearest Neighbor
MAE	Mean Absolute Error
RE	Relative Error
RMSE	Root Mean Square Error
RS	Recommender System
PNCF	Propagated Neighborhood based Collaborative Filtering
SVD	Singular Value Decomposition
UBCF	User Based Collaborative Filtering

TABLE OF CONTENTS

CHAPTER 1.....	1
INTRODUCTION.....	1
1.1 Recommender System.....	1
1.1.1 Uses of Recommender Systems.....	2
1.1.2 Architecture of Recommender Systems.....	3
1.1.3 Recommender System Evaluation Criteria.....	3
1.2 Motivation.....	4
1.3 Work by Other Researchers.....	5
1.4 Thesis Organization.....	6
CHAPTER 2.....	8
LITERATURE REVIEW.....	8
2.1 Collaborative Filtering Based Recommender Systems.....	8
2.2 Content based Recommender System.....	11
2.3 Neighborhood Based Recommender System.....	13
2.4 Trust Based Recommender System.....	14
2.5 Case Intelligence Based Recommender System.....	14
2.6 Matrix Factorization Based Recommender System.....	15
2.7 Hybrid Recommender system.....	17
2.8 Problem Statement and Approach.....	19
2.8.1 Problem Statement.....	19
2.8.2 Scope of Work.....	19
2.8.3 Approach.....	20
CHAPTER 3.....	22
PROPOSED MODEL FOR RECOMMENDER SYSTEM.....	22
3.1 Dimensionality Reduction.....	22
3.1.1 Singular Value Decomposition.....	22
3.1.2 Dimensionality Reduction Using SVD.....	23
3.1.3 SVD Computation of a Matrix.....	24
3.1.4 Querying New Users.....	25
3.2 Truncated SVD.....	26
3.3 Measuring the Similarity between Items.....	27

3.3.1 Traditional Similarity Functions.....	28
3.3.2 Conditional Probability Based Similarity.....	29
3.3.3 Predictions From Item-Item Similarity.....	30
Chapter 4.....	31
IMPLEMENTATION.....	31
4.1 Problem Definition:.....	31
4.2 Important Steps Involved.....	32
4.2.1 Smoothing.....	32
4.2.2 Employing the SVD model to reduce Dimensionality.....	33
4.2.3 Using SVD to make Prediction Matrix.....	34
4.2.4 Computing Prediction Matrix for Item-based CF.....	34
4.2.5 Combiner.....	35
4.2.6 Making Recommendations.....	35
4.2.7 Predicting For New User.....	36
4.2.8 Evaluating Error Rate.....	36
4.2.9 Comparison with Previous Strategies.....	36
4.3 Flow-Chart of proposed Recommender Model.....	37
4.4 Complete Algorithm.....	38
Chapter 5.....	40
EXPERIMENTAL ANALYSIS.....	40
5.1 Dataset.....	40
5.2 Simulation Environment.....	40
5.2.1 Brief Discussion about Python.....	41
5.3 Results.....	41
Chapter 6.....	48
CONCLUSION AND FUTURE WORK.....	48
6.2 Future Scope of Work.....	48
REFERENCES.....	49
