

# CERTIFICATE

This is to certify that the dissertation title “*Design of Minkowski Fractal Antenna*” is the authentic work of **Mr. Munish Gupta** under my guidance and supervision in the partial fulfillment of requirement towards the degree of Master of Technology in *Microwave and Optical Communication*, jointly run by the Department of Electronics and Communication Engineering and Department of Applied Physics at *Delhi Technological University, New Delhi*. To the best of my knowledge, the matter embodied in the thesis has not been submitted to any other University/Institute for the award of any other degree.

**Mr. Prem.R.Chadha**  
Supervisor  
Associate Professor  
Deptt. of ECE  
Delhi Technological  
University, New Delhi

**Prof. Rajiv Kapoor**  
Head of Department  
Deptt. of ECE  
Delhi Technological  
University,  
New Delhi

**Prof. S.C.Sharma**  
Head of Department  
Deptt. of Applied  
Physics  
Delhi Technological  
University,  
New Delhi

# DECLARATION

I, Munish Gupta, ROLL No. 2K12/MOC/09 student of M.Tech (Microwave & Optical Communication) , hereby declare that all the information in these documents has been obtained and presented in accordance with academic rules and ethical conduct. It is being submitted for the degree of Master of Technology in Microwave and Optical Communication at Delhi Technological University. It has not been submitted before for any degree or examination in any other university.

Place:

Name: Munish Gupta

# ACKNOWLEDGEMENT

With all praises to the almighty and by His blessings I have finally completed this thesis.

I would like to express my gratitude to **Mr. Prem.R.Chadha**, Associate Professor, Department of Electronics & Communication Engineering, Delhi Technological University, New Delhi, who has graciously provided me his valuable time whenever I required his assistance. His counselling, supervision and suggestions were always encouraging and it motivated me to complete the job at hand. He will always be regarded as a great mentor for me.

I am deeply grateful to **Prof. Rajiv Kapoor**, Head of Department (Electronics and Communication Engineering), Delhi Technological University for his support and encouragement in carrying out this project.

I would like to thanks **Prof. S.C.sharma**, Head of Department (Applied Physics), Delhi Technological University for his support and encouragement in carrying out this project.

I would also like to thank **Dr. R.K.Sinha**, Professor and **Dr. Ajeet Kumar**, Assistant Professor, Department of Applied Physics, Delhi Technological University, New Delhi for their valuable comments and suggestions

I would like to express my heartiest thank to my friends and seniors for constant support and motivation. Last but not least I thank my parents, for everything I am and will be in future. It's your unspoken prayers and affection that keep me moving forward.

## ABSTRACT

Communication between humans was first by sound through voice. With the desire for slightly more distance communication came, devices such as drums, then, visual methods such as signal flags and smoke signals were used. These optical communication devices, of course, utilized the light portion of the electromagnetic spectrum. It has been only very recent in human history that the electromagnetic spectrum, outside the visible region, has been employed for communication, through the use of radio. One of humankind's greatest natural resources is the electromagnetic spectrum and the antenna has been instrumental in harnessing this resource.. Nowadays wireless communications systems (GSM/UMTS/WIFI) require compact antennas which are small in size and also capable of operating at different bands. Fractal geometry antennas are studied in order to answer those requirements. Recent studies show that the fractal structures have their own specific characteristics that improve certain properties of antenna (when talking about low profile antennas). Fractal antenna is comprised of elements patterned after self-similar designs. Self-similarity of the fractal shape can be translated into its electromagnetic behaviour. Fractal antennas are very old in concept and very new in design for broadband applications. Many discontinuities in the structure aid in radiating higher frequencies. Both miniaturization and broadband coverage are the greatly achievable factors in this type. This thesis covers basically two aspects. First is the design of a square patch antenna radiating in L-band at around 1.32GHz and then using this square patch antenna as basic structure for developing first three order of Minkowski fractal antenna and which leads to the result that shows multiband characteristics of these fractal antennas radiating from L-band to S-band.

## TABLE OF CONTENTS

<b>CERTIFICATE</b>	<b>(ii)</b>
<b>DECLARATION</b>	<b>(iii)</b>
<b>ACKNOWLEDGEMENT</b>	<b>(iv)</b>
<b>ABSTRACT</b>	<b>(v)</b>
<b>CONTENTS</b>	<b>(vi)</b>
<b>LIST OF FIGURES</b>	<b>(ix)</b>
<b>Chapter 1: Introduction</b>	<b>1</b>
1.1 Brief Technical Overview	1
1.2 Objectives	1
1.3 Methodology	1
1.4 Report Organization	1
<b>Chapter 2: Theory of Antennas</b>	<b>3</b>
2.1 Introduction	3
2.2 Antennas Background	3
2.3 Antenna Parameters	3
2.4 Brief Overview on Scattering Parameters	8
2.5 Microstrip Antennas	9
2.6 Microstrip Patch Antennas	10
2.7 Monopole Antennas	10
2.8 Matching Techinques	11
2.9 Feeding techniques	12
2.10 Summary	15
<b>Chapter 3: Fractal Antennas</b>	<b>16</b>
3.1 Introduction	16
3.2 Fractals	16
3.3 Fractal Antennas	18
3.4 Iterated Function Systems (IFS)	18
3.5 Fractal Geometries	19
3.5.1 Koch Curve	19
3.5.2 Sierpinski Gasket	20
3.5.3 Minkowski Curve	21

3.5.4 Cohen-Minkowski Geometry	22
3.6 Summary	22
<b>Chapter 4: Design of Square Patch Antenna</b>	<b>23</b>
4.1 Transmission Line Model	23
4.1.1 Fringing Effect	23
4.1.2 Effective Length, Resonant Frequency, and Effective Width	25
4.2 Design	26
4.2.1 Specification	26
4.2.2 Design Procedure	26
4.3 Simulation in ADS	27
4.4 Results of Simulation	28
4.5 Result	29
4.6 Summary	29
<b>Chapter 5: Design of Minkowski Fractal Antenna From Square Patch Antenna</b>	<b>30</b>
5.1 Introduction	30
5.2 Design of First Order Minkowski Fractal Antenna	30
5.2.1 Specification	30
5.2.2 Simulation in ADS	31
5.2.3 Results of Simulation	31
5.3 Design of First Order Minkowski Fractal Antenna	33
5.3.1 Specification	33
5.3.2 Simulation in ADS	33
5.3.3 Results of Simulation	34
5.4 Design of First Order Minkowski Fractal Antenna	35
5.4.1 Specification	35
5.4.2 Simulation in ADS	36
5.4.3 Results of Simulation	37
5.5 Result	38
5.5.1 For First Order Minkowski Fractal Antenna	38
5.5.2 For Second Order Minkowski Fractal Antenna	38
5.5.3 For Third Order Minkowski Fractal Antenna	38
5.6 Summary	38

**Chapter 6: Final Conclusion and Future Work**

## LIST OF FIGURES

2.1 Example of Radiation pattern	6
2.2 Example of radiation pattern, two dimensional plot	7
2.3 Example of radiation pattern, normalised plot	7
2.4 Generalized two port network, [S] represents the scattering matrix	8
2.5 Side view of microstrip patch	9
2.6 Top view of microstrip patch	9
2.7 Microstrip Patch Antenna	10
2.8 Microstrip line feeding	12
2.9 Coaxial Probe feeding	13
2.10 Aperture couple feeding	13
2.11 Proximated couple feeding	14
2.12 Structure of coplanar waveguide feed	15
3.1 Coastline	16
3.2 Lightning	16
3.3 Brocoli	17
3.4 Snowflake	17
3.5 Sierpinski Carpet .	17
3.6 Lorentz attractor	17
3.7 Mandelbrot set	17
3.8 Koch Snowflake	17
3.9 Three iterations of the Koch fractal	19
3.10 Four iterations of the Sierpinski fractal	20
3.11 Sierpinski Gasket monopole	20
3.12 Feed line system	21
3.13 Frequency radiation (one antenna 4 bands	21
3.14 Three iterations of the Minkowski curve	21
3.15 Two iterations of the Cohen-Minkowski geometry	22
4.1 Microstrip line and its electric field lines, and effective dielectric constant geometry	24
4.2 Effective dielectric constant versus frequency for typical substrates	24
4.3 Physical and effective lengths of rectangular microstrip patch	25

4.4 Square patch antenna with coaxial feed $L=W=54\text{mm}$	27
4.5 Design of square patch antenna in ADS	27
4.6 Design of square patch antenna in ADS (3D Geometry View	28
4.7 S-Parameter Display for square patch microstrip antenna.	28
4.8 Smith chart display for square patch microstrip antenna	29
5.1 Generator for Minkowski fractal antenna	30
5.2: First order Minkowski fractal antenna	30
5.3 Design of first order Minkowski fractal antenna in ADS	31
5.4 Design of first order Minkowski fractal antenna in ADS (3D Geometry View)	31
5.5: S-Parameter Display for order Minkowski fractal antenna	32
5.6 Smith chart display for first order Minkowski fractal antenna	32
5.7 Second order Minkowski fractal antenna	33
5.8 Design of second order Minkowski fractal antenna in ADS	33
5.9: Design of second order Minkowski fractal antenna in ADS (3D Geometry View)	34
5.10: S-Parameter Display second order Minkowski fractal antenna	34
5.11: Smith chart display for second order Minkowski fractal antenna	35
5.12: Third order Minkowski fractal antenna	35
5.13: Design of third order Minkowski fractal antenna in ADS	36
5.14: Design of third order Minkowski fractal antenna in ADS (3D Geometry View)	36
5.15: S-Parameter Display third order Minkowski fractal antenna	37
5.16: Smith chart display for third order Minkowski fractal antenna	37
