

List of Figures

Figure Number	Figure Title	Page Number
2.1	Block Diagram of the system	9
2.2	Flow of object detection	14
2.3	Binary image	17
2.4	Image is labeled in the same row	17
2.5	Labeled image is scanned from top-left to bottom-right	18
2.6	Final labeled image	18
3.1	Depth Modeling	22
3.2	Trajectory of different objects through x co-ordinate.	23
3.3	Trajectory of ROI through y co-ordinate	24
3.4	2D Plot of the ROI Trajectory	24
3.5	3D mapping of the objects state.	25
4.1	HMM for position without background consideration	29
4.2	HMM for position with background consideration	30
4.3	HMM for velocity without background consideration	30
4.4	HMM for velocity with background consideration	31
4.5	HMM for acceleration without background consideration	32
4.6	HMM for acceleration with background consideration	32
4.7	Fuzzy Logic System	34
4.8	Plot of Input Variables	35
4.9	Plot of Output Variables	35
4.10	Dataset Image consisting of the ROI & the reference points of the background along with the calculated parameter.	37
4.11	Frames showing the variation in ROI position with respect to the reference points.	38
4.12	Plot of the predicted state of the ROI from the fuzzy rules with respect to reference points.	39
4.13	SVM Classification without considering the background reference points	40
4.14	SVM Classification with the consideration of the background reference points	41
5.1	Evaluation Steps of DS _m T	47
6.1	Frames showing the tracking of an object with the consideration of the background reference points.	50
6.2	Frames showing the tracking of an object without the consideration of the background reference points.	51

List of Tables

Table Number	Table Title	Page Number
4.1	FIS Parameters	36
4.2	Few developed fuzzy rules of the system	37
5.1	Generalised basic belief assignments of three experts with the results of the three combination rules	48
7.1	Results on video based from PETS database	54
