Conformational Profile Assessment of Cathelicidin (LL-37) Using Molecular Dynamics Simulation

A Major Project dissertation submitted in partial fulfillment of the requirement for the degree of

Master of Technology

In

Bioinformatics

Submitted by

Kamakshi
(Roll no: 2K11/BIO/10)

Delhi Technological University, Delhi, India

Under the supervision of

Dr. Vimal Kishor Singh

Department of Biotechnology
Delhi Technological University
(Formerly Delhi College of Engineering)
Shahbad Daulatpur, Main Bawana Road, Delhi-110042, India

CERTIFICATE

This is to certify that the M. Tech dissertation entitled **"Conformational profile assessment of Cathelicidin (LL-37) using Molecular Dynamic Simulation"** submitted by **Kamakshi (Roll no: 2K11/BIO/10)** in partial fulfillment of the requirement for the award of the degree of Master of Technology, Delhi Technological University (Formerly Delhi College of Engineering, University of Delhi), is an authentic record of the candidate's own work carried out by her under my guidance.

The information and data enclosed in this dissertation is original and has not been submitted elsewhere for honoring of any other degree.

Date: July 11, 2013

Dr. Vimal Kishor Singh
Assistant Professor, O/I Stem Cell Research Laboratory
Department of Bio-Technology
Delhi Technological University
(Formerly Delhi College of Engineering)

Acknowledgement

First and foremost, I would like to express my sincere gratitude towards Dr. Punit Kaur, Additional Professor and Head of Department, Department of Biophysics, All India institute of Medical Science (AIIMS), Delhi-110016 for providing me with this opportunity to work at AIIMS. I appreciate the trust she placed in me and the freedom she gave me to make mistakes and learn from them.

I would like to acknowledge my deep sense of gratitude to Professor S. Maji, (Head of Department) Department of Biotechnology, Delhi Technological University, Delhi-110042 for giving me an opportunity to study and work in this prestigious Institute.

I extend my thanks to my mentor Dr. V.K. Singh for giving me the opportunity to work under him and for giving me the freedom to carry out this project the way I wanted to. Without his support and guidance it would not have been possible.

No words are adequate to express my feelings of profound gratitude for Dr. Parul Sharma for her guidance, valuable suggestions, persistent encouragement and generosity all through the tenure of this project. Her constructive criticism and deep insight inspired me to submit this work in the present form. She has been responsible for smoothing all the rough edges in this investigation

I consider myself lucky to have worked at AIIMS. My seniors Manoj sir, Yamini ma'am, Kulsum ma'am made the lab feel like a second home. My colleagues, Roopali, Vindhya, Shriram, Kaamna, Qamar, Asmita. Harpreet, made each day enjoyable and have enriched this experience.

I am extremely thankful to my friends Sudhanshu, Narendra, Nupur ma'am, Deepti, Vineet, for their unending support, unconditional help, warmth and patience always.

No words to describe the encouragement that my mother has given me all through. She has been no less than a life support system and the reason I exist. This work is dedicated to her.

KAMAKSHI

TOPIC	***PAGE NO.***
List of figures	*i-ii*
List of tables	*iii*
List of abbreviations	*iv-v*
Abstract	*1*
Aims and Objectives	*2*
Introduction	*3-4*
Chapter 1	*5-23*
1.Review of Literature	*5*
1.1 Peptides	*6*
1.2 Protein/peptide folding	*6*
1.3 Stem cells and homing	*9*
1.4 Anti-Microbial peptides	*10*
1.5 Cathelicidin	*12*
1.6 Structure of LL-37	*14*
1.7 Mechanism of Action of Anti-Microbial Peptides: Cathelicidin	*15*
1.8 LL-37 and Stem Cell Homing	*15*
1.9 Molecular Modeling	*16*
1.10 Molecular Mechanics	*16*
1.11 Molecular Dynamics	*17*
1.12 Energy Minimization procedures in Simulations	*21*
Chapter 2	*24-33*
2.Computational Procedures	*24*
2.1 Amber 12.0	*25*
2.2 Conformation Classification	*27*
2.3 GROMACS	*30*
Chapter 3	*34-40*

3 Methodology	*34*
3.1 MD on Linear and NMR Structure of LL-37 using GB Method and Langevin Thermostat Algorithm	*35*
3.2 MD Simulations using the Explicit Solvent Method and Berendsen Thermostat	*38*
Chapter 4	*41-79*
4. Results	*41*
*4.1 Analysis of MD Simulation on Linear Structure of LL-37 using GB Method and Langevin Thermostat Algorith*m.	*42*
4.2 MD on NMR Structure of LL-37 using GB Method and Langevin Thermostat Algorithm	*56*
4.3 Analysis of MD Simulations using the Explicit Solvent Method and Berendsen Thermostat	*70*
Chapter 5	
5. Conclusion	*81*
Chapter 6	
6. Discussion and Future Perspective	*83*
