

“THERMAL ANALYSIS OF WASTE HEAT RECOVERY IN CEMENT PLANT”

Submitted to Delhi Technological University in Partial Fulfilment of the Requirement for the
Award of the Degree of

**Master of Technology
In
Mechanical Engineering**

With specialization in Renewable Energy Technology

By
CHANDRA SHEKHAR SOM
(2K13/RET/01)

Under the guidance of
DR. RAJESH KUMAR
(Associate Professor)
Department of Mechanical Engineering

DELHI TECHNOLOGICAL UNIVERSITY

Shahabad Daulatpur
Bawana Road, Delhi-110042, INDIA
SESSION 2013-15

CERTIFICATE

This is to certify that the project entitled “Thermal Analysis of Waste Heat Recovery in Cement Plant” being submitted by me, is a bonafide record of my own work carried by me under the guidance and supervision of Dr. Rajesh Kumar (Associate Professor) in partial fulfilment of requirements for the award of the Degree of Master of Technology in Renewable Energy Technology from Department of Mechanical Engineering, Delhi Technological University, Delhi.

The matter embodied in this project either full or in part have not been submitted to any other institution or University for the award of any other Diploma or Degree or any other purpose what so ever.

Chandra Shekhar Som

Registration Number: DTU/13/M-Tech/192

University Roll Number: 2K13/RET/01

This is to certify that the above statement made by the candidate is correct to the best of our knowledge.

DR. RAJESH KUMAR

(Associate Professor)

DEPARTMENT OF MECHANICAL AND PRODUCTION ENGINEERING
DELHI TECHNOLOGICAL UNIVERSITY

Shahabad Daulatpur, Bawana Road, Delhi-110042, India

ACKNOWLEDGMENTS

I have a great pleasure in expressing my deep sense of gratitude and indebtedness to Dr. Rajesh Kumar of Mechanical Engineering Department, Delhi Technological University for his continuous guidance, invaluable suggestion and exquisite time at all stages from conceptualization to experimental and final completion of this project work. I also wish to place on record the patience and understanding shown by Sir at critical situations. Along with academics, I learnt from him the resilience to undertake challenges that the research world would be putting my way.

I am also grateful to Prof. (Dr.) R. S. Mishra, Head, Department of Mechanical Engineering, Delhi Technological University for providing the experimental facilities. His constant support, co-operation and encouragement for successful completion of this work.

Above all, I owe it all to Almighty God for granting me the wisdom, health and strength to undertake this research task and enabling me to its completion.

Chandra shekhar som

TABLE OF CONTENTS

Certificate	ii
Acknowledgements	iii
Table of contents	iv
Symbols used	1
Table of figures	2
Abstract	3
1.0 Introduction	4
1.1 What is waste heat	4
2.0 Literature Review	6
3.0 Factors Affecting Waste Heat Recovery Feasibility	9
3.1 Heat quantity	10
3.2 Waste Heat Temperature/Quality	10
3.2.1 Heat Exchanger Area Requirements	
3.2.2 Temperature and Material Selection	
3.3 Waste Stream Composition	12
3.4 Minimum Allowable Temperature	13
3.5 Economies of Scale, Accessibility, and Other Factors	15
4.0 Classification and Application of waste heat	14
4.1 High Temperature Heat Recovery	
4.2 Medium Temperature Heat Recovery	
4.3 Low Temperature Heat Recovery	
5.0 Benefits and barriers of Waste Heat Recovery	18
5.1 Direct Benefits	
5.2 Indirect Benefits	
5.3 Barriers in waste heat recovery	
6.0 Waste Heat Recovery Options and Technologies	21
6.1 Heat Exchangers	21
6.1.1 Recuperator	

6.2 Regenerator	22
6.2.1 Furnace Regenerator	
6.2.2 Rotary Regenerator/Heat Wheel	
6.3 Passive Air Preheaters	
6.4 Regenerative/Recuperative Burners	
6.5 Finned Tube Heat Exchangers/Economizers	
6.6 Waste Heat Boilers	
7.0 Power Generation technologies using waste heat	26
7.1 Generating Power via Mechanical Work	27
7.1.1 Steam Rankine Cycle	
7.1.2 Organic Rankine Cycle	
7.1.3 Kalina Cycle	
7.2 Direct Electrical Conversion Devices	29
7.2.1 Thermoelectric Generation	
7.2.2 Piezoelectric Power Generation	
7.2.3 Thermionic Generation	
7.2.4 Thermo Photo Voltaic (TPV) Generator	
8.0 CASE STUDY	32
• Power generation from waste heat in cement plant	
9.0 CONCLUSION	42
